The sober man is to himself a Law,  
His Reason can his boyish passions awe;  
But for the Half-brain'd furious wight we see,  
Too little is Kings-Bench and Chancery  
To keep him in: His Country's Customs too,  
Gods Laws and all, he strives to overthrow.

To know the Hour when any Star cometh upon the Meridian any day of the Month.

## The R U L E.

**F**irst seek the Right Ascension of that Star required in the foregoing Tables (of the Right Ascension of the Stars) and also the Right Ascension of the Sun for the day of the Month, from the right Ascension of the Star subtract the Right Ascension of the Sun; but when the Right Ascension of

## Culpepper 1700.

of the Star is less than the Right Ascension of the Sun, then add 24 hours thereto, and the Remainder will shew you the hour after noon when the Star comes upon the Meridian, and if it do exceed 12 hours, then subtract 12 hours therefrom, and the Remainder shall shew the Hour and Minute of the Stars coming upon the Meridian after midnight.

### Example 1.

Upon the tenth of April I would know when the Lions Heart cometh upon the Meridian. Therefore if you look in the Tables of right Ascension for that Star, you will find it to be 9 h. 51 m. Then look in the Tables of Right Ascension of the Sun, and right against the 10<sup>th</sup> of April you will find the right Ascension of the Sun to be 1 h. 54 m. which subtracted from the Right Ascension of the Star, there remains 7 h. 57 m. which is the true time that the Star cometh to the Meridian after noon.

### Example 2.

Upon the fifth of November, I desire to know when the Bulls Eye cometh upon the Meridian: The right Ascension thereof by the Tables you will find to be 4 h. 17 m. the right Ascension of the Sun that day is 15 h. 23 m. Therefore because the right Ascension of the Star is less than the right Ascension of the Sun, I add 24 hours to the right Ascension of the Star, which maketh 28 h. 17 m. From which subtract the right Ascension of the Sun, and the Remainder is 12 h. 54 m. from which I subtract the 12 hours, and the Remainder is 54 minutes after Midnight, then the said Star cometh upon the Meridian.

And here note, That the table of right Ascension of the Sun, is calculated for noon every day; and that it doth increase by about 4 minutes each day; so that it may be proportioned for every six hours to allow one minute for the time after noon.

*Of the Suns Eclipse.*

**W**HEN as the Sun his Light seems for to Lose,  
The proper cause thereof we thus Disclose;  
It is the Moons Gross body (wanting Light)  
That (as a Window shut) hides from our sight  
The Suns Bright Beams, and makes his face obscure,  
So long as the Conjunction doth endure  
The Suns Eclipse to those by whom 'tis seen,  
Doth not in Obscuration equal seem.  
By some th' Defect's seen more, by others Less;  
All that see it don't equall Light possess  
Eclipses Ominous are, of strange events,  
As publick Ruines mortal Discontents.  
To Mankind, Beasts and Cattel they prelage  
Disasters and Diseases thence to Rage.  
For every hour of Time this greater Light  
Is passive and Deficient from our sight,  
One year for the effects (thence to succeed)  
Are Limited, as Modern Authors Read.

*Of the Moons Eclipse.*

**W**HEN as a Mask or Vizard seems t' affright  
Watch-candle Luna, Governess of the Night,  
The Dark and Gloomy Barth (this Massy-Ball)  
Then Interpos'd (like a Partition Wall)  
Between the Sun and her Declining Face  
Occasions her Eclipsical Disgrace.  
To all that view this Light both far and near,  
Th' Defect in equal measure doth appear.  
The Moons Eclipses always signifie  
Fire, Sicknes, War, or some Calamitie.  
And look how many hours the Moon doth lack  
Her Total light (which by the Earth's held back)  
So many Months the Antients apprehend,  
Th' effects to Last, and after that to end.

*October.*

Sow Wheat and Rye, the sooner the better, for fear of vain, set Acorns and Nut, gather winter Fruit, the weather dry, in the afternoon, and in the wain of the Moon, cut Rose-trees if you desire to have store of Roses, do this once in two years, refuse not any needfull Physick at the hands of the Learned, and use all moderate Sports to revive the vital Spirits.

In this and the next Month cut down Timber, in the last quarter of the Moon uncover the Roofs of Fruit-trees: set Beans and Peas, cover all the best Flowers and Herbs from Frosts and Storms with old rotten Horse-dung, look well to your Cattle, water and keep moist your Meadows, let Horses bloud, and drink good Wine and Strong Drink, keep thy Body warm clad, thy House warm and dry, cast all care from you, and relieve those that are in want with thy Charity. Thus have I ended these Observations which are laid down for thy advantage, make good use of them, and give God the Glory.
